ABSTRACT OF THE DISCLOSURE

A method for enabling a user of a client to see whether or not printing is completed is provided. A Web print server generates data in accordance with a printing request sent from the client, and sends the data to a printer device. In accordance with reception of the printing request sent from the client, the Web print server sends a request for acquiring a Web page to the client. The client receives the request for acquiring the Web page from the Web print server, and acquires a Web page indicating the state of processing of a print job in the printer device, the Web page being sent from the printer device. The Web page is displayed on a display unit.
